Glitzy foil is adding shimmer and shine in the papercrafting world. Let's see what all of the buzz is about!

*d*esign team member Nicole Nowosad spent some time experimenting with various ways to add foil to her designs. Her tips and ideas are sure to get you excited to add the gorgeous luster of foiling to your designs!

FOIL QUILL BY WE R MEMORY KEEPERS

To create this layout, Nicole opened a cut file and enlarged it to 300%.

She filled in the inside of the design with sketch lines and then shrank the cut file to correctly fit the layout. Once the cut file was ready, she ran it through her electronic die cutting machine with black foil and the proper Foil Quill tip. The Foil Quill drew over each of the sketched lines, leaving the foil behind.

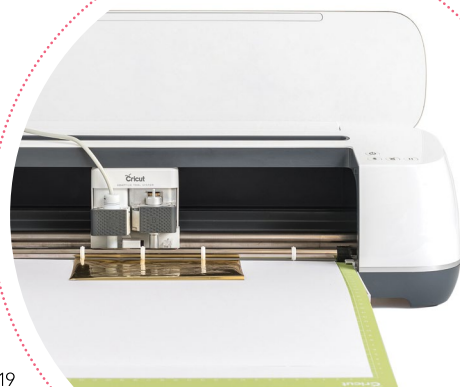

FOILING TIP: Here's a no-machine-necessary foiling tip! Nicole created sparkle on her letter stickers (which are sticky on the TOP and bottom) by rubbing foil on the adhesive. No heat required!

love you

FOILING TIP: The shiny side of the foil always goes up when running through the machine.

2 THERM O WEB CLEAR TONER SHEETS

Turn your laser printer into a foiling partner with Therm O Web's clear toner sheets and their sparkling rainbow array of gorgeous foil colours!

STEP-BY-STEP

- 1 Make card from cardstock.
- 2 Trim patterned paper squares and adhere to card base in a quilt pattern.
- 3 Punch border from cardstock panel, adhere to card base, and stitch.
- 4 Print butterfly design on laser printer using Therm O Web Clear Toner Sheets. Run through heated laminator with foil, and fussy cut butterfly.
- 5 Add thread to buttons, adhere to finished butterfly, and adhere butterfly to card front.
- 6 Adhere sentiments using foam tape for one.

FOILING TIP: Let your machine heat up before running items through. And don't be afraid to run an item through the machine two times to get solid coverage.

happy with you

3 MINC BY HEIDI SWAPP

While absolutely anything can be foiled with a laser printer, Heidi Swapp has come up with an array of products that are Minc-ready with toner-appropriate designs ready to foil with the super cute Minc machine.

STEP-BY-STEP

- 1 Make card from cardstock.
- 2 Trim cardstock panel and add paint with brayer to create background.
- 3 Run Heidi Swapp Minc patterned paper through Minc machine with gold foil and punch circles from foiled patterned paper. Adhere to panel.
- 4 Fussy cut flowers from patterned paper and adhere to panel.
- 5 Run the Minc compatible happy die cut through the machine with Glitter Foil and adhere to panel.
- 6 Adhere sentiment sticker and heart.
- 7 Stitch finished panel to card base.
